

May 22, 2014; 19:00h

Technische Universität Darmstadt,
Lecture Hall 122, im Alten Maschinenhaus
Gebäude S105, Magdalenenstraße 12
64289 Darmstadt

Tickets: EUR 5,00 plus EUR 0,50 VVK

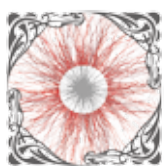

Vorverkauf:
Darmstadt Shop am Eingang des Luisencenters, Luisenplatz 5

QUANTUM BEAUTY

Public Lecture as part of the Quark Matter 2014 Conference in Darmstadt
Öffentlicher Vortrag in englischer Sprache

Professor Frank Wilczek, MIT, USA
Nobel Prize in Physics in 2004

Does the world embody beautiful ideas? Pythagoras and Plato intuited that it should, Newton and Maxwell showed, in impressive examples, how it could. Modern physics demonstrates, in depth and detail, that it does. I will narrate, through notable examples, how the concept of beauty in physical law has evolved – and how it continues to guide our quest for ultimate understanding.
